Right now, I'm sure you're looking at a ton of different options for your athletic portraits. And I'm honored, to say the least, that you're considering me as one of them.

Athletic portrait photography is my passion. It's always been my motto that if you can't put your whole heart into it, you shouldn't do it. Your athletic portraits are something I put my whole heart into. I aim to make every athlete that walks into my studio feel like they matter. Like they are my number one priority that day and for all our days together. I focus on a low volume, high quality experience.

I am constantly searching for new locations, while still being able to utilize current ones without overuse and the same poses. I aim to further my education every single year to keep up with the most modern trends, flattering poses and up-to-date techniques to make your portrait experience fresh, fun and timeless. It's always a goal for me to be able to make your images stand out. To make you the star, the focus. I want other teams to look at your athletic images and know that you chose Natalie Roberson Photography.

It's imperative that we showcase your personality and talents through this whole process. Because these images are 100% uniquely you and your team. Your ideas, whatever they may be and wherever they may take us, are so important to me.

Once you become a client, I am there through every step of the process. I will aid you in every area that you may need help with. From choosing locations and designs, I am there. Open communication is key for me. Let me help you make your athletic portraits a time in your life you will never forget.

## INDIVIDUAL SPORTS COMPOSITES

You are an athlete! You work your tail off all year long...and have so for years to get where you are in your sports career. This is your year...don't you want to celebrate your success by capturing it an awesome way?

Don't settle for an ordinary photographer; at Natalie Roberson Photography we take pride in our incredible life like composites and sports inspired art. We have been creating sport banners and metal prints for teams and individuals for years, and every year we increase our knowledge and digital artistry to better improve our sports image compositing skills.

Merging digital elements together with a photo allows us to create something unique and new. We take your ideas, photograph you for a few minutes at the studio or on location on a green screen doing what you love... then we sit and work hours on the computer to create a unique, never-before-seen amazing final creation customized just for you.

## TEAM SPORTS COMPOSITES

We can handle your league large or small. Any sport, anywhere in North Texas. Let us show you how to take your league or school's photography to a whole new level. Locally owned and operated, we handle the parents so your staff doesn't have to. Finally, youth sports league photography done right.

We bring the very best on location portraiture to your youth sports league. Using the very same methods, equipment, and lighting that we use in studio, we can bring provide you with the best League/School sports portraits you have ever seen.

We shoot your players using state of the art lighting on hollywood green screens, so we can deliver unrivaled exciting graphic designs and fresh background options every season.

With all of the pre-cautions in place for COVID related issues, we can shoot each player or student at CDC safe distances and merge them together to create an Epic Sports Composite without compromising your health!

After scheduling the photo day, our complete transparency with the parents and school/league staff allows us to work with the parents directly after the photographs have been taken so that you don't have to!
